

Dr. Phil Brown

Bio:

Phil leads Cray's worldwide engagement with the Earth Sciences segment including numerical weather prediction, climate research and earth observation. Previously Phil was a technical architect and led Cray's response for a number of large European procurements, including both systems dedicated to Earth Science such as the Met Office and ECMWF, and more general purpose systems such as ARCHER (the UK national HPC service). Before joining Cray in 2011 Phil worked for a specialist High Performance Computing consultancy to UK government. Phil holds a PhD in Chemistry from the University of Bristol, focused on parallelizing computational chemistry codes for early floating point accelerator technology.
