Yoonho (Yoon) Park

Bio:

Yoonho (Yoon) Park is a Senior Manager at the IBM T. J. Watson Research Center in Yorktown Heights, NY. He leads the software teams in the Data Centric Systems (DCS) Department. The DCS Department produced the Blue Gene supercomputers and is now constructing the CORAL Sierra and Summit supercomputers. Yoon received a PhD in Computer Science and Engineering from the University of Michigan. In the past, Yoon developed the virtual memory system and file system for IBM SawMill Linux — a decomposed Linux running on the L4 microkernel, the network stack for ReefEdge Networks, the network stack for IBM InfoSphere Streams, and IBM FusedOS — a hybrid operating system that combines Linux and CNK.
