

Title:

Scientist Perspective -Big Data

Abstract:

This talk will focus on reproducibility, archive service, responsibility, and cost of saving large volumes of research datasets. In particular I will focus on the challenges in these areas related to model output:

- Where to save?
- How long to keep the data?
- Who bores the cost?
- In the long term, who's responsible for
 - Curating the data?
 - Maintaining the related software?
 - Serving the data to broad base of users users?
